Accessibility Statement for Ident-A-Kid Visitor Management

Ident-A-Kid is committed to ensuring digital accessibility for people with disabilities. We are continually improving the user experience for everyone and applying the relevant accessibility standards.

Conformance status

The Web Content Accessibility Guidelines (WCAG) defines requirements for designers and developers to improve accessibility for people with disabilities. It defines three levels of conformance: Level A, Level AA, and Level AAA. Ident-A-Kid Visitor Management is partially conformant with WCAG 2.0 level AA. Partially conformant means that some parts of the content do not fully conform to the accessibility standard.

Some of the measures taken to make identakid.com accessible include:

- descriptive alt text values are assigned to all images
- ensuring a minimum 4.5:1 color ratio for all text
- using descriptive text links and headers
- maintaining a consistent and predictable layout throughout the site
- incorporating a skip navigation link
- making all text zoomable up to 200%
- eliminating all potentially distracting elements (e.g. pop-ups, auto-playing video, etc.)
- ensuring the website is navigable by keyboard only
- presenting content in a meaningful order
- providing a focus indicator for all active components of the website
- No focus change
- No input change
- Error identification
- Form label and instructions
- Clear link anchor text
- Multiple ways to access webpages and information through the search bar, navigation menus, and linked text

Beyond our existing remediation measures, we continually review our website to ensure we adhere to best practices in web accessibility.
